

# Military

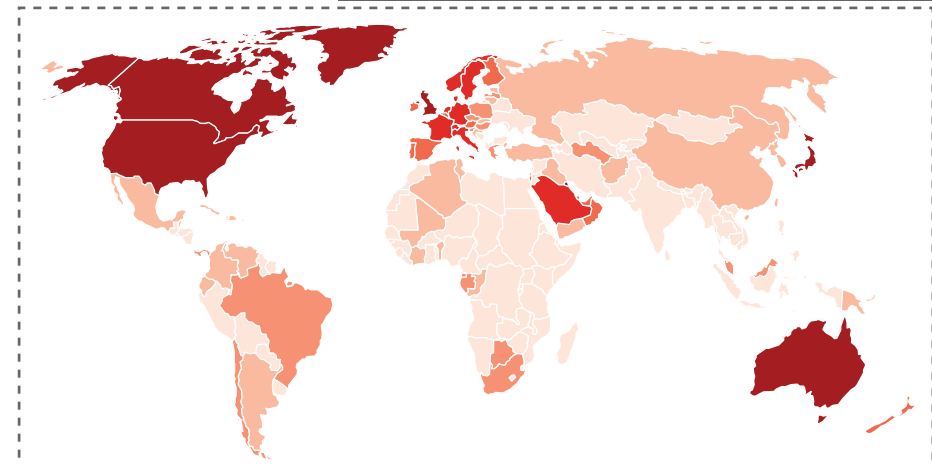

## Number of Troops and Defense Spending

The size of the country represents the number of persons in Armed Forces. One square equals 7500 troops

Top Ten Largest Militaries (in thousands of troops)

Robinson Projection Colored with Same Data

Data are from the United Nation Development Program's 2004 Human Development Report. The choropleth map is classed using a slightly modified George Jenks optimal method.

Cartographer: Zachary Forest Johnson (indiemaps.com)  
 For: Dr. Mark Harrower's Geography 572 at the University of Wisconsin

Every gun that is made, every warship launched, every rocket fired, signifies, in the final sense, a theft from those who hunger and are not fed, those who are cold and are not clothed.

-- Dwight D. Eisenhower
